Jury of Awards
of
The Louisiana Purchase Exposition.

F O R E W O R D

THE first edition of "Modern Bath Rooms" was issued four years ago, and while considered very complete at the time, containing 54 pages, our readers will notice a vast improvement in this, the fifth edition, which contains almost twice as many pages, and gives much practical advice for the home builder or those desiring to remodel their present sanitary equipment. Attention is particularly directed to that portion of the book illustrating bath room, kitchen and laundry interiors, which are reproduced direct from photographs of our goods.

"Standard" Baths and Plumbing goods need no introduction to the American public, nor, for that matter, to the entire world. Their great and constantly increasing use in every country on the globe proclaims them to be of the highest quality that skillful workmanship and best material can produce.

HEALTH, CLEANLINESS, HAPPINESS

THESE conditions may as readily be attained by bathing in a porcelain enameled bath as by indulging in the popular pastime of surf bathing as depicted by our artist.

You will so much enjoy using, in your own home, a pure white inviting bath with an overhead shower that the pleasure you derive from ocean bathing will be relegated to a secondary position in your list of enjoyments.

DESIGNS OF MODERN BATH ROOMS

" Certainly this is a duty, not a sin,
" Cleanliness is indeea next to Godliness."

— John Wesley

DESIGN NUMBER P 2 3

BATH. 5-foot Plate P 200 4¾-inch Roll Rim **"Standard"** Porcelain Enameled "Albion" Bath, with Exterior Finished in No. 1 Zinc White and Plate P 358 "Empire" Border, with Nickel-plated Imperial Bell Supply and Waste Fittings $82.50

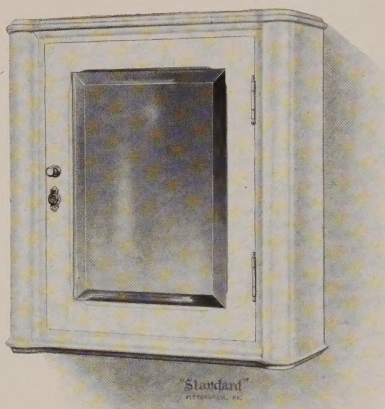
"Standard" MEDICINE CABINET



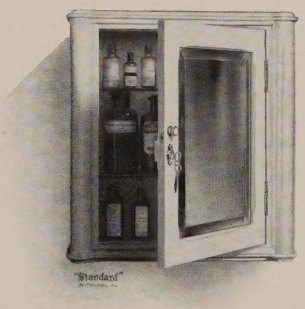
"Standard" Colonial Design White Enameled Medicine Cabinet.

P 498 . . . . . $20.00

NOTE—Not illustrated in General Catalogue "P."

This elegant Medicine Cabinet is furnished with plate glass shelves, and is finished inside and out with best quality enamel paint. It is constructed of thoroughly seasoned hardwood; the mirror is best quality French beveled plate. It is a superior article in every respect, and so constructed that neither dirt nor dust can find a lodging place.

Can be furnished in special woods and finishes if desired. (Prices upon application.)



HARMONIOUS DECORATIVE EFFECTS

HARMONIOUS decorations produce the highest artistic effect. As a finishing touch to your bath room, permit us to decorate the bath and other fixtures to which ornamentation is applicable, to harmonize with the environment.

The process of finishing the exterior of **"Standard"** Porcelain Enameled Ware is of such a nature that it can only be applied at our factories, inasmuch as the castings must be dressed perfectly smooth, a character of work which requires special facilities and skill.

Our prices are moderate, being lower in comparison than you would be required to pay a painter to put on the same number of coats of ordinary paint, without the baking and hand rubbing to which all fixtures which we decorate are subjected. In addition, baths, etc., decorated by our process will wear better and be more satisfactory in every respect.

Decide upon the decorative design desired, and have your plumber order us to execute it for you. If in doubt, confine the decorative treatment to three narrow gold lines placed near the top of the bath and on other fixtures to harmonize. (We use only pure gold leaf.) This treatment is simple, dignified and always appropriate.

"Standard" Decorations

All decorative borders are executed strictly by hand with the very best class of materials obtainable, and are as dainty and artistic as the paintings executed on fine china ware.

The following plate numbers, descriptions, prices and illustrations on pages 50 and 51 are identical with those given in our General Catalogue "P."

NOTE — Gold bands or lines can be put on either No. 1 or No. 2 finish, but borders can be furnished on No. 1 finish only. The No. 1 finish is furnished in pure White (or Zinc) as specified, but Ivory or Cream White, if desired, can be furnished instead without extra charge.

Description of Decorations	On Foot Baths and Receptors	On Sitz Baths	On Baths and Pools

Plate P 369 — No. 1 Zinc White Exterior Finish, with Apple Blossom Border

THE CARE OF A MODERN BATH ROOM

DO not use any gritty polishing or scouring preparations in cleaning the fixtures; the frequent use of soap and warm water should be sufficient.

Should this not have the desired effect, however, we recommend "Porcela," which is manufactured especially for cleaning porcelain enameled ware. It is the best preparation made for the purpose and is guaranteed to be absolutely harmless. Ask your plumber or druggist for it (price 10 cents per box), or send us 20 cents in stamps for sample ½ pound by mail.

Use whiting for polishing nickel work. It is just as effective, if frequently applied, as harmful acid preparations which will soon destroy the nickel.

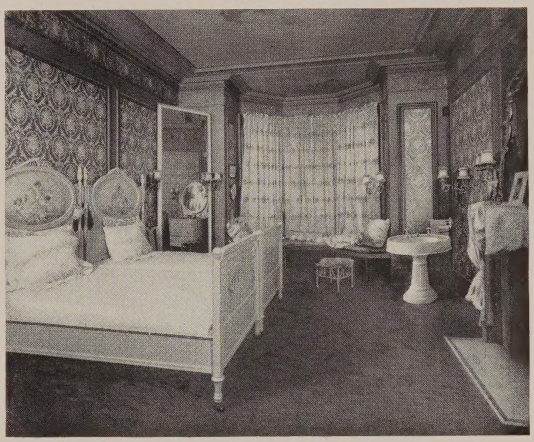
Give the same careful attention to the bath room that you would bestow on the best room in the house. Treat **"Standard"** Porcelain Enameled Ware as you would fine china or glassware.

There is no other part of a house that will give the same amount of satisfaction and pleasure for the care devoted to it as the bath room.

LAVATORIES FOR DRESSING CHAMBERS

EVERY lady's dressing chamber should be equipped with a dainty **"Standard"** lavatory.

Have you ever stopped to consider how delightfully convenient it would be to have hot and cold running water in your dressing chamber, sleeping apartment or first floor toilet room? Its presence would afford you the highest degree of comfort.



Design "N"
Sleeping Apartment with **"Standard"** Lavatory

If your room contained a lavatory you would not be required, when arising in the morning, to partially dress in order to reach the bath room to perform the toilet, and possibly disturb the other members of the household. The afternoon and evening toilet could also be made amid the same pleasant surroundings. The many advantages of the strictly modern idea of having **"Standard"** lavatories in the rooms mentioned are readily appreciated.

One other suggestion is that you should not overlook the arrangement of suitable sanitary equipment for the rooms occupied by your maid, butler and other servants. Proper provision in this respect will encourage scrupulous attention to their personal cleanliness and appearance.

The lavatory shown above is the "Copley" design, Plate P 500. (See page 61.)

Progressive architects specify individual lavatories for sleeping apartments and dressing chambers.

ARTISTIC WINDOWS

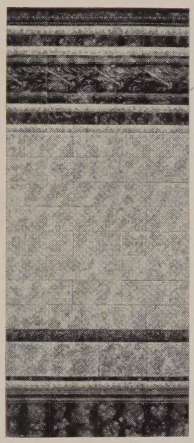
A BATH ROOM is not entirely complete if proper treatment of its lighting, both natural and artificial, is neglected. Art glass windows are so reasonable in cost that the most moderate cottage can afford this finishing touch to the most important room in the home — the bath room. Glass like shown on this page or in our various interiors on preceding pages, costs from 75 cents to $3.50 per square foot, depending on the design and the locality.

By all means, if building or remodeling, consult a reliable art glass manufacturer or dealer, and add this touch of beauty to your home. It is not necessary to confine the purchasing of art glass windows to one locality; by sending your window sash to any manufacturer in the country, and stating your preference for color scheme and design, with the price per square foot you desire to pay, the manufacturer will return to you your sash fitted with the glass, all ready to put in your window frame.

Art Glass Window designed especially for Bath Rooms

We know several first-class reliable art glass manufacturers, and will be glad to give our readers their addresses upon application. We recommend that your home or nearest dealer or manufacturer be patronized if possible, to save transportation charges and time.

WALL AND FLOOR TREATMENT

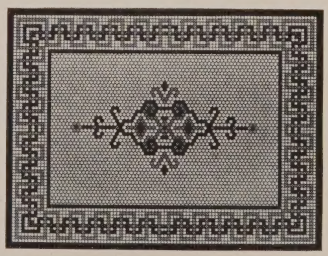


Section of Wall Tile

WALLS and floors can be treated in many ways, all inexpensively, but the ideal modern bath room should be tiled, not necessarily all over, but floors in unglazed ceramic or interlocking rubber tile. If, however, it is desired to economize, have a hardwood floor of oak, maple, birch or Georgia pine, filled, stained, oiled or waxed to suit the individual taste. A small artistic rug, oriental preferred, costing from $5.00 to $25.00, will give the room a finishing touch. Do not think of using a wood floor in a bath room without attempting to make it as near waterproof as possible, or you may ruin your ceiling or wall decoration on the floor below, as has so often occurred where only ordinary soft pine floors have been put in bath rooms without filling, oiling or waxing to prevent water soaking through.

Glazed white or unglazed tinted tiles make the best wall covering for the bath room, especially for wainscoting, 4, 4½ or 5 feet high. Above the wainscot, finish in oil colors, decorated canvas or burlap, to suit the individual taste. Never use ordinary wall paper on bath rooms, as the steam and moisture soak the paper and cause it to fall off or discolor. It is best not to paint directly on the plastered walls, as cracks may develop and spoil all your decoration. Glazed tile paper can be used, but it costs almost as much as the decorated walls, and is not near so artistic or durable.

It is preferable not to make the bath room all white, as it gives a cold, cheerless appearance, and does not add any to its sanitary effectiveness. Decorate the walls and ceilings with some light tint, such as pale green, buff, terra cotta, etc. The ceiling should be two or three shades lighter than the side walls, but in the same general tone or color scheme.



Design for Bath Room Floor Tile

DESIGN, FINISH AND DURABILITY

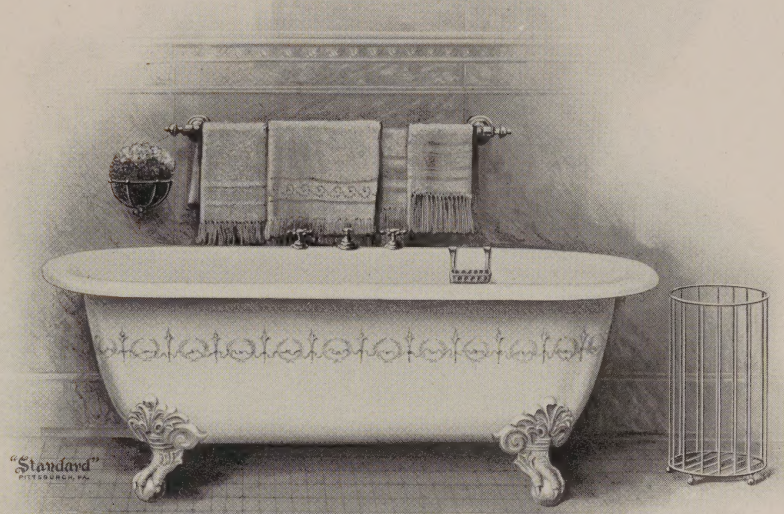
THE smooth surface and pure glossy whiteness of **"Standard"** Porcelain Enameled Ware combine the beauty and cleanliness of china with the strength and durability of iron. **"Standard"** Porcelain Enameled Ware is a perfect unity of iron and porcelain enamel, differing from the ordinary white enamels in that the surface will not "flake off" the iron, as it is substantially inseparable, and, being of equal elasticity, will not crack or craze.

It is essential to perfect sanitary conditions that the surface of any fixture in the bath or toilet room be hard, smooth and non-absorbent, and **"Standard"** Porcelain Enamel provides these features in the highest possible degree.

Aside from the practical use and sanitary effectiveness, it is possible to produce with this material a more symmetrical fixture than with any other, particularly glazed earthenware, as with the latter material it is practically impossible to make fixtures of this kind in any of the lighter or more graceful designs.

"Standard" Porcelain Enamel is warranted not to craze or crack, and the guarantee which this name carries with it is a perfect assurance against the annoyance caused by the use of inferior and non-guaranteed brands.

We guarantee every item of material and workmanship to be exactly as represented.



The "Albion." Plate P 200

"Standard" PORCELAIN ENAMELED Bath, and Nickel-plated Imperial Bell Supply and Waste Fittings, with ¾-inch I. P. Size Supply Pipes with Unions at Floor. Exterior finished in No. 1 Zinc White with Plate P 358 "Empire" Border.

If without Stops on Supply Pipes, deduct per pair $2.50

If with Supply Pipes with Stops, and Vented Trap to floor, instead of as shown, add $0.75

THE SHOWER BATH

A BATH ROOM is not complete if it is without some style of shower. To those who desire the more elaborate permanent fixtures we call attention to our line. We make a specialty of building showers to order — any shape or size — and to fit any space, for any purpose. Prices for permanent showers range from $25 to $500. Ask your plumber to show you our General Catalogue "P," illustrating many styles of showers which we carry in stock. Special shapes and sizes built to order on short notice.

The luxury and pleasure of a shower bath is a revelation to those not already acquainted with its charming delights.

Life itself takes on added pleasures from the tonic effect of the daily shower. It invigorates, renews vitality and strengthens the heart action by increasing the surface circulation, all of which stimulate the appetite and improve the general health.

Beauty depends more upon health than anything else, and one of the best methods of gaining and retaining perfect health is to bathe, and bathe often, once a day always, but twice is much better.

BATHING OR SHAMPOOING

WOMEN frequently object to the use of a shower bath on account of the wetting of the hair. In order to overcome this, we furnish, free of charge, with each shower, a rubber cloth cap of the highest grade and quality through the use of which this wetting is obviated. To most women the shampooing of their hair is a tedious and vexatious task, but not so if they use a shower bath, as a much more satisfactory shampoo may be had in five minutes with a shower, than in half an hour without.

The "Standard" Portable Shower is worth all it costs for this purpose alone, and is a real necessity for every home not otherwise equipped with a permanent shower.

It can be attached to any bath fitted with Double Bath or Top Nozzle Supply Faucet.

A shower bath is unquestionably healthful and enjoyable after exercising

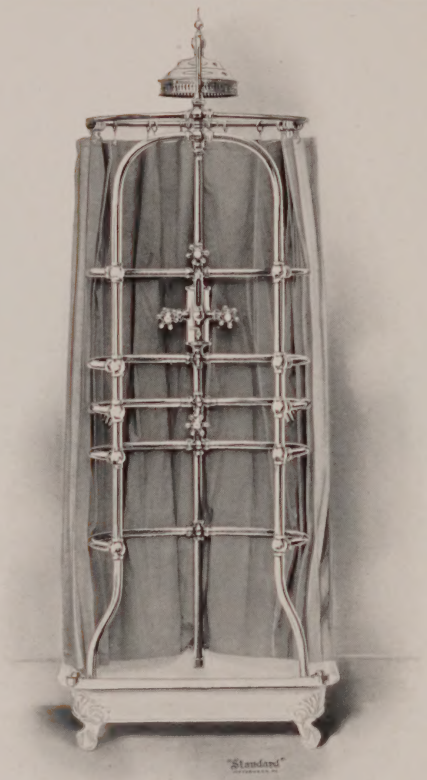

Plate P 404

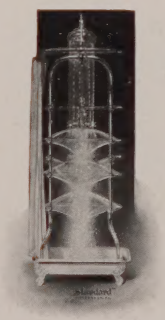

"Standard" Nickel-plated Brass Combination Shower and Needle Bath, with Liver Sprays, China Index Valves, Mixing Chamber, Thermometer and Rubber Curtain.

Price as described $183.50

For **"Standard"** Porcelain Enameled 36-inch Receptor, with Nickel-plated Waste Strainer and Coupling, add . $25.00

For No. 1 Zinc White Finish on Exterior of Receptor, add 6.50

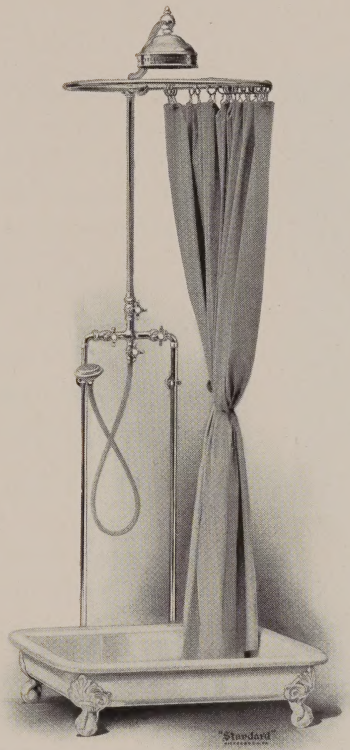

Plate P 415

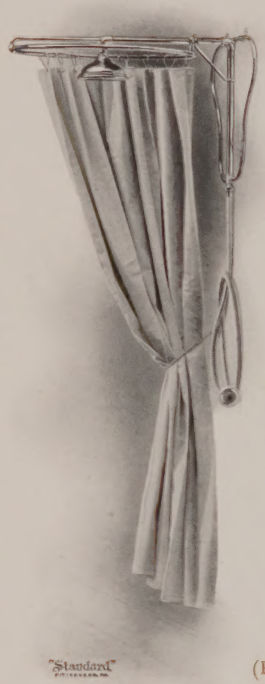
"Standard" Nickel-plated Brass Shower, with China Index Valves, Shampoo and Rubber Curtain.

Price as described $52.00

For **"Standard"** Porcelain Enameled 36-inch Receptor, with Nickel-plated Waste Strainer and Coupling, add $25.00

For No. 1 Zinc White Finish on Exterior of Receptor, add . . . 6.50

Shower can be connected to use over bath, instead of with Receptor, if desired



The **"Standard"** Portable Shower Bath is in daily use by thousands who have learned the value of physical culture followed by a shower. All agree on the permanency of its strengthening and invigorating effects.

The **"Standard"** Portable Shower is an ideal fixture for those who live in rented houses or apartments. It is, as its name implies—portable—easily put in place or removed. It is inexpensive when compared with the permanent showers, and though portable, its operation is just as efficient. If you move it is not a part of the permanent plumbing to be left for the next tenant.

Plate P 419

(Patented October 22, 1895)

"Standard" Nickel-plated Portable Shower Bath, with Needle Spray and Improved Holdfast (Patented), Rubber Tubing, and Curtain of best quality White Rubber Cloth or Waterproof White Duck, as desired.

Improved Holdfast
(Patented Oct. 4, 1904)

DANGERS OF DEFECTIVE OR INFERIOR PLUMBING

DEFECTIVE plumbing permits the entrance into the house, of sewer gas bearing germs of contagious diseases to which the human system readily succumbs.

It should be remembered that sewer gas is not necessarily generated in the sewer, but that it is quite as frequently created in the plumbing system within the house itself. This is invariably the case if there are any obstructions or uneven surfaces in the pipes where filth may collect.

Not only must the gas from the sewer be prevented from entering the house, but that from the waste pipes within must be thoroughly excluded from the apartments and its egress provided for.

If your plumber has not done a perfect piece of work, or if the plumbing has become deranged, your dwelling is contaminated with sewer gases and you are at the mercy of the germs which this foul air carries.

The most dangerous and deadly sewer gases are often inodorous, and are therefore not discovered until ill health renders necessary an examination of the existing sanitary conditions, but often too late to repair the damage done.

"Standard"

PORCELAIN ENAMELED CLOSET COMBINATIONS

IN this class of sanitary equipment, perfect sanitation is most essential. The surface of the material used should be hard, smooth and permanently non-absorbent, and it is in these features that "Standard" Porcelain Enameled Ware is unequaled.

The materials consist of a perfect enamel of porcelain united with specially prepared iron in such a manner that their ratios of expansion, elasticity and contraction are equal, and therefore without the tendency to craze or crack under frost or extreme changes, a fault almost inseparable from earthenware, or ordinary enameled iron.

The low tank combinations illustrated herein are conceded to have advantages over high tanks, due to their compact construction and different principles of operation. They can be installed under windows or stairways and similar places where there is not sufficient height for the high tank combinations, and they lend themselves more readily to the artistic and economic arrangement of the bath or toilet room. They also have the additional advantage of being more nearly noiseless. By reducing the height from which the water falls in flushing the bowl, the consequent noise is also proportionately diminished.

All parts of these fixtures are made in our own factories, and each combination is fitted and thoroughly tested before shipment.

"Standard" Porcelain Enameled Closet Bowls are as much superior to earthenware bowls as "Standard" one-piece lavatories are to marble or earthenware wash-stands.

"Standard" CLOSET COMBINATION

The "Delecto"

"Standard" PORCELAIN ENAMELED "Delecto" Syphon Jet Closet, with 2-inch Brass Flush Connection, and Improved Roll Top Flushing Rim, 1½-inch Oval Saddle Seat and Panel Cover (Piano Finish) attached with Heavy Nickel-plated Cast Brass Offset Hinges, Colonial Column Copper-lined Tank, with Solid Top and Push Button, Nickel-plated Supply Pipe, Flush Connection, Spun Cups, Brass Floor Flange, Rubber Gasket, Screws, Bolts and Washers complete.

Plate P 802

Plate P 802 as described, with Enameled All Over Bowl, and Natural, Antique or Golden Quartered Oak, or Imitation Cherry, Mahogany, or Rosewood Tank, Seat and Cover $36.00

If with Tank and Seat as shown, Plate P 826, deduct . . 5.50

If with High Tank and Seat as shown, Plate P 853 B, deduct 1.00

Size of Tank	22 x 11 x 10
Quartered Oak	$2.00
Cherry (Genuine)	2.75
Walnut	3.50
High Dutch Oak	4.25
English Oak	4.25

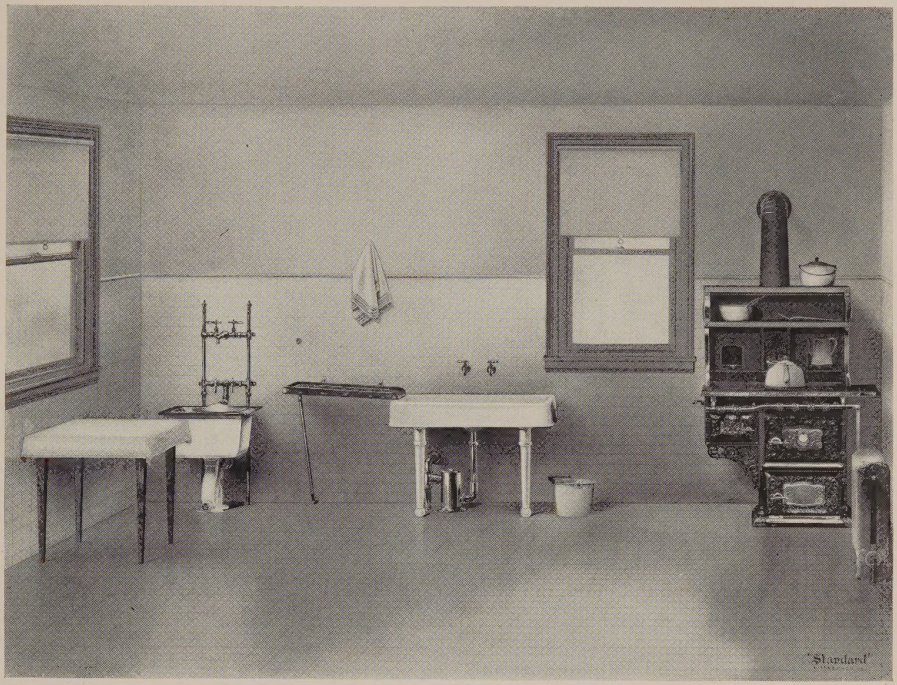
VALUE OF HIGH GRADE SANITARY PLUMBING

GOOD plumbing is one of the most important features about a house, and should receive careful attention at the hands of the owner at the time the architect is making the plans and specifications.

It does not pay to install cheap plumbing, because there is no one feature in the construction of a house that will be as unsatisfactory—both as to the fixtures and the workmanship. On the other hand, there is nothing which will appeal so strongly to the fastidious and careful housewife, and be so great a source of enjoyment, as modern high grade plumbing.

Many families pay out yearly for doctor bills, for sickness caused by deadly sewer gases due to poor plumbing, more than the difference between the cost of the cheapest and the best work.

You cannot have too many safeguards for the health of your family and yourself. It is well to keep in mind, when arranging the sanitary equipment of your home, the fact that your family may be required to occupy the house for a long period (without new plumbing being installed), therefore, the slight extra cost of the best plumbing will, in reality, be *health assurance*, as well as a saving in repair bills.



"Standard"

MODERN KITCHEN, DESIGN A

ADVICE TO PROSPECTIVE BUILDERS

CHOOSE only well designed and approved styles, and select furnishings or fixtures in harmony with your building.

Accept good work and reliable service only.

Imitations are shams at best; have none of them. If necessary to reduce cost, build smaller and use fewer fixtures, rather than cheaper ones.

Read your specifications carefully and study your plans frequently—become familiar with every detail, even if it becomes necessary to seek professional advice.

Inferior goods and cheap workmanship give poor service and are more expensive in the end.

Good taste should not be sacrificed to economy.

"Standard"

MODERN KITCHEN, DESIGN B

THE ARCHITECT

FOR economic and practical results, an architect should be consulted on all building operations, no matter how small. His services are not expensive, on the contrary his counsel will in most cases result in an absolute saving.

The modern architect devotes years to the scientific study of all matters pertaining to his profession, and is therefore qualified to develop beauty and strength from seemingly unimportant details, which the ordinary builder would overlook, as well as to make the best use of space, and in the end blend the entire operation into a harmonious home or other building, as the case may be.

The architect's services are also valuable in the selection of the proper materials, and in acting as arbiter of disputes which might arise between the owner and the contractor. The contractors, anticipating future business from the architect, will be more willing to abide by an adverse decision from the architect than from the owner. Every chance is in favor of the architect saving you money if you do not hamper him.

"Standard"

MODERN KITCHEN, DESIGN C

THE MODERN LAUNDRY

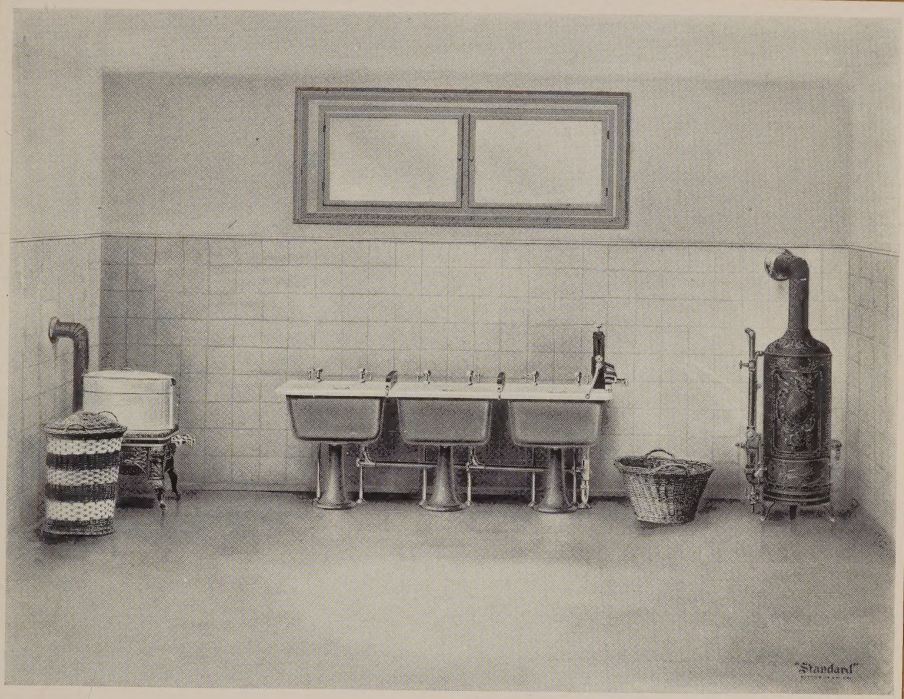
A WELL equipped laundry is just as essential to the happiness of the modern housewife as the bath room.

When the laundry is fitted with a set of snowy white "Standard" Porcelain Enameled Laundry Trays, it may be truly called *a modern laundry*, as there is no water to carry, no leakage and damp floors, and no tubs to upset. "Standard" Laundry Trays are made in many designs of one, two or three compartments (each compartment in one piece, free of joints), complete with wringer holders and every thoughtful convenience.

"Standard" Porcelain Enameled Ware is the only perfect material for laundry trays. Slate, soap stone, earthenware and other such porous substances, absorb the wash water and suds, and long after being emptied remain damp and discolored, emitting objectionable odors. "Standard" Laundry Trays are absolutely free from these unsanitary features.

A Modern "Standard" Laundry

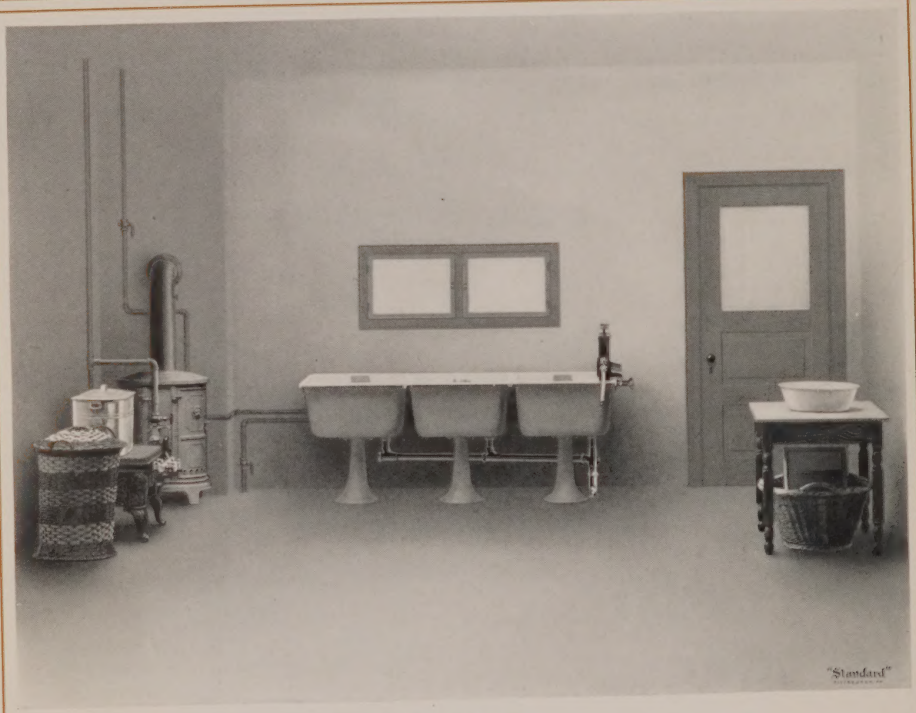
The arrangement of the laundry should provide for good light and perfect ventilation, and the hot water heating apparatus should be such as to provide an abundant supply at all times.



"Standard"

MODERN LAUNDRY, DESIGN H

The new way



"Standard"
MODERN LAUNDRY, DESIGN I

The old way

THE MODERN KITCHEN

AN error commonly made by home owners is in underestimating the necessity of proper sanitary equipment for the kitchen. Only a few years ago it was considered good form to encase the sink in wood, thereby concealing the trap, making it inaccessible and offering an opportune place for the collection of germs and vermin. Many persons have actually been horrified to examine conditions of this kind and learn the true state of affairs.

Do not permit this condition to exist in your household. If there is need for improvement do not delay, and if you are building a new home provide as liberally as possible for the kitchen. Do not lose sight of the fact that your food is prepared in the kitchen and the utensils in which it is prepared depend on the sanitary arrangements for cleanliness, therefore safeguard against contamination of either food or utensils.

Acids, lye, coffee grounds, tea leaves and other such substances should not be emptied into the sink. Acids will harm the material of which the sink is composed, coffee grounds and tea leaves will adhere to waste pipes, and lye which many use to cleanse the waste, will, when combined with water and grease, form soap and clog the pipes. Hot water and ammonia used frequently, will keep drain pipes in good condition.

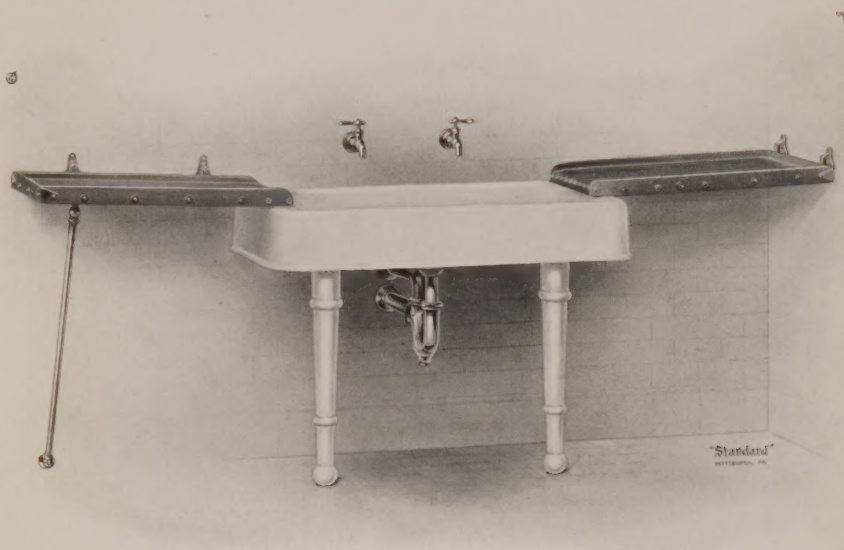


Plate P 1246

(Patented June 21, 1904)

"Standard" Porcelain Enameled Sink, with Apron all around, Enameled Sink Legs and Wall Supports, 30-inch Right "Perfection" Ash Drain Board, hinged at End to Wall, and 30-inch Left "Perfection" Ash Drain Board, with Nickel-plated Telescope Support, Nickel-plated Strainer, Fuller Adjustable Flange Bibbs and "P" Trap with Waste and Vent to Wall.

	24 x 42 in.
Plate P 1246 as described	$60.25
If with Vented Trap to floor instead of to wall, as shown, add	.25

If without Drain Boards, deduct for Left $12.00, for Right $10.00

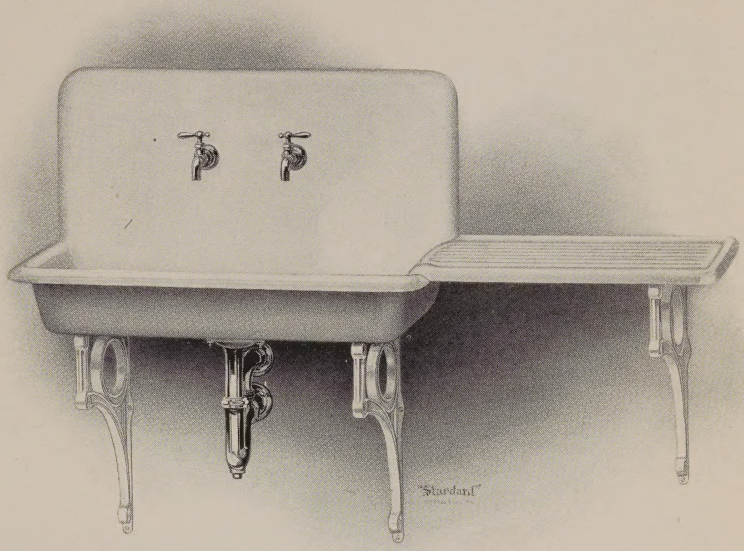

Plate P 1201

"Standard" Porcelain Enameled Roll Rim Sink and Back *all in one piece*, with Porcelain Enameled Interchangeable Drain Board (24 inches long), Brackets, Nickel-plated Strainer, Fuller Adjustable Flange Faucets, Concealed Galvanized Air Chambers and "P" Trap with Waste and Vent to Wall.

HOW TO ORDER

WHEN specifying or ordering "Standard" Goods please mention design or plate number to avoid confusion and errors, as many of the same designs have been shown in previous catalogues under different plate numbers.

While we do not, as a matter of policy, quote prices or accept orders direct from the consumer, builder or contractor, any information relative to sanitation or the goods illustrated herein, that does not conflict with our policy, will be supplied as promptly and satisfactorily as possible.

If you have decided to use any of our fixtures, all that is necessary to do, in case you are building, is to instruct your architect to specify "Standard" goods, made by THE Standard Sanitary Mfg. Co. PITTSBURGH, U. S. A.

The plumber who is successful in securing your contract will, without any difficulty whatever, be able to secure "Standard" goods, as they are sold all over the world, and are carried in stock by dealers and plumbers generally.

IN CONCLUSION

FOR the convenience of those receiving this book we beg to append a list of our Factories, Branches, Showrooms and Offices, where information pertaining to our goods will be cheerfully imparted. Inquiries sent to any of the following addresses will receive prompt attention.
